1. Scene Description

A simple interactive 3D scene showing an indoor games room where several recreational setups are arranged for players. The room contains two carrom boards, a table tennis board with paddles and a ball, a table with chairs for seating, and two almirahs for storing equipment. A ceiling-mounted light source illuminates the room, creating a bright, lively indoor gaming atmosphere.

2. Objects Used in the Scene

The scene will consist of the following objects, all constructed from basic geometric primitives (cubes, planes, cylinders, and spheres) generated from scratch by the program:

Object	Description	Primitives Used
Floor	Ground plane of the room	Plane / Cuboid
Walls	Surrounding walls of the room	Plane / Cuboid
Light Source	Ceiling light providing illumination across the room	Sphere / Cylinder
Table	Tabletop with four legs for the seating area	Cuboids
Chairs	Seat, backrest, and four legs; multiple placed around the room	Cuboids
Almirah (x2)	Storage cabinets with a body, shelves, and doors	Cuboids
Carrom Board (x2)	Flat board with raised border and corner pockets	Cuboid / Cylinder
Table Tennis Board	Tabletop with legs and a net divider at the center	Cuboid / Plane
TT Paddles (x2)	Paddle blade with a short handle for each player	Cuboid / Cylinder
TT Ball	Small round ball used for table tennis play	Sphere
